SUBJECT INDEX

Acrylonitrile, pp. 59, 120, 188, 288
Aeromatic oil, p. 343
Aniline point, p. 59
Antioxidants, p. 266
Asphaltic pavements, p. 307
  Elvax, p. 307
  fatigue behavior, p. 307
  fracture, p. 307
  Kraton, p. 307
  Novophalt, p. 307
Biaxial data, p. 224
Binary rubber blends, p. 158
Boron compounds, p. 358
  additives, p. 358
  cure retardability, p. 358
  scorching, p. 358
Bromobutyl rubber, p. 158
Butadiene-acrylonitrile copolymers, pp. 59, 120, 188
Carbon black, p. 288
Coran's model, p. 358
Co-vulcanization, p. 158
Critical fiber concentration, p. 46
Critical solution temperature, p. 59
Crosslinking, pp. 106, 143, 158
Crystallinity, p. 143
Curing
  characteristics, p. 358
  crosslink formation, p. 358
  delay time, p. 358
  kinetics, p. 358
  precursor formation, p. 358
  radical formation, p. 358
  rate index, p. 358
Dicumyl peroxide, p. 12
Dielectric constant, p. 59
Die swell, p. 46
Dispersion forces, p. 188
Dynamic mechanical analysis, p. 158
Dynamic rheometry, p. 22
Dynamic vulcanization, pp. 74, 249
Elastomer modified polypropylene (TPO), p. 322
Elastomers, p. 120
Epoxidized natural rubber, p. 343
  dynamic mechanical properties, p. 343
  isothermal properties, p. 343
  low temperature flexibility, p. 343
  plasticizer concentration, p. 343
Fiber concentration, p. 46
Fiber loading, p. 46
Filler loading, p. 322
Flory-Rehner equation, p. 188
Gamma radiation, p. 12
Gasohol, p. 120
Gaussian curve, pp. 120, 188
Gibbs equation, p. 188
HDPE, p. 12
Intensive mixing, p. 322
Levenberg-Marquardt-Fletcher algorithm, p. 224
Linear viscoelasticity, p. 22
Liquid molar volume, p. 188
LLDPE, p. 12
Loss tangent, p. 143
Magnetic tapes, p. 216
  deformation, p. 216
  laser speckle technique, p. 216
  nondestructive testing (NDT), p. 216
  warping, p. 216
Miscibility, pp. 106, 158
Miscibility number, pp. 59, 120
Molar transition energy, pp. 59, 120
Molecular weight distribution p. 22
Natural rubber, pp. 46, 158
  chlorinated, p. 106

(continued)

Subject Index (continued)
Natural rubber *(continued)*
epoxidized, p. 106
thermal aging, p. 249
vulcanizates, p. 266
Nitrile rubber, pp. 59, 74, 120, 188, 249, 288
acid-base interactions, p. 188
carboxylated, p. 106
conversion, p. 288
cure curves, p. 288
swelling, pp. 120, 188,
NR-HDPE, p. 46
Ogden's Law, p. 224
Oxidative degradation, p. 143
Plastic-rubber blends, p. 106
Polarity index, pp. 59, 120, 188
Polybutadiene, p. 22
Polydispersity, p. 22
Polyethylene, pp. 22, 46
Polymer modifiers, p. 307
Polymeric additives, p. 307
Polymerized butadiene, p. 288
Polyolefins, p. 12
Polystyrene, p. 22
Pseudoplastic materials, p. 46
Pyridazine derivatives, p. 266
Quenching ratio, p. 358
Radiation crosslinking, p. 12
Reactive compatibilizer, p. 106
Reptational chain relaxation, p. 22
Rheology, p. 46
Rubber, p. 224
blends, pp. 106, 158
bromobutyl, p. 158
carboxylated nitrile, p. 106
chlorinated natural, p. 106
epoxidized natural, p. 106
natural, pp. 46, 158
nitrile, pp. 59, 74, 120, 188, 249
SBR, p. 22
Secondary accelerators, p. 266
Self-crosslinkable blend, p. 106
Sheer rates, p. 46
Short carbon fiber, p. 46
Solubility parameter, pp. 59, 120
Solvents, pp. 59, 120, 188
Stiffness/impact balance, p. 322
Stress relaxation, p. 46
Stress-strain behavior, p. 143
Ternary blend, p. 106
Thermoplastic copolyester, pp. 74, 249
Thermoplastic elastomers, pp. 46, 74, 249
Triads, p. 188
Vulcanizates, pp. 59, 120, 266
natural rubber-based, p. 358
nitrile rubber-based, p. 358
silicone rubber-based, p. 358
Vulcanization kinetics, p. 266
XL-20, p. 143
XLPE, p. 143

AUTHOR INDEX

Aglan, H., p. 307
Benjeddou, A., p. 224
Bhattacharya, A. K., p. 46
Bortolozzi, R. A., p. 22
Cai, F., pp. 74, 249
Chaki, T. K., p. 143
Chakraborty, K. K., p. 358
De, S. K., p. 106
Dieber, J. A., p. 22
Dutta, N. K., p. 158
Francis, D. J., p. 12
George, K. E., p. 12
Goodman, J., p. 322
Gupta, B. R., p. 46
Hadhri, T., p. 224
Isayev, A. I., pp. 74, 249
Ismail, M. N., p. 266
Jankovich, E., p. 224
Khastgir, D., p. 143
Kurian, P., p. 12
Lau, E., p. 322
Maity, S. K., p. 358
Moslehy, F. A., p. 216
Peirotti, M. B., p. 22
Ramesh, P., p. 106
Rice, S. L., p. 216

Roy, D., p. 46
Seif, M. A., p. 216
Starmer, P. H., pp. 59, 120, 188, 288
Tawfik, S. Y., p. 266
Tripathy, D. K., pp. 158, 343
Varughese, S., p. 343
Yehia, A. A., p. 266
